Filed: December 1, 2000	)		
	)		
For: SOMATOSTATINS AND METHODS	)		

AMENDMENT AND RESPONSE

Assistant Commissioner for Patents  
Washington D.C. 20231

Dear Sir:

In response to the Office Action mailed June 28, 2002, please amend the above-identified application as follows:

In the Specification

Please replace the paragraph beginning at **page 11, line 7**, with the following rewritten paragraph. Pursuant to 37 C.F.R. §1.121, this paragraph is also shown in Appendix A with notations to indicate the changes made.

LI Trout preprosomatostatin-II" (PPSS-II") is described herein in Example III and is shown in Fig. 1 and Fig. 3. PPSS-II" is characterized by a 600 base pair cDNA (SEQ ID NO:20) that encodes a precursor protein of about 111 amino acids (SEQ ID NO:15) that appears capable of being processed into a 25 amino acid polypeptide (SEQ ID NO:16), and further into a 14 amino acid peptide (SEQ ID NO:2). Because this tetradecapeptide has the modified [Tyr<sup>7</sup>, Gly<sup>10</sup>] sequence, these somatostatins are members of the SS-II family.
